

ALLPROUSA

All Pro USA Video Production Inc.

412-370-4422

info@AllProUSA.com

This Qualifications Page includes information regarding the company history as well as general Training, Safety, Alcohol and Drug program information

Company Overview

For the past 15 years our specialty has been pre construction video and construction photography. Our reputation in this specialized field has grown with positive comments of Project Managers and Engineers that were more than happy to recommend us for great construction site video & photo documentation.

Construction Experience

AllProUSA produces construction videos & photos for all types of industries. Our website is fully dedicated to Construction video and construction photography. Our construction documentation includes detailed work in industries including

Manufacturing, Water/Sewer Lines, Water Treatment Plants, Electric Transmission and General Contracting.

Web Site Samples

Take time to look at samples from across the USA and you will see a wide variety of most recent work as well as great archival videos from the past at www.PreConVideo.com

Certifications

All team members are OSHA-10 certified. Our Drone Pilots are full time employees of All Pro USA and are fully certified and licensed by the the F.A.A. for commercial work.

Safety

The Safety of our team and everyone involved with our project is #1. Our team members are required to wear Personal Protection Equipment (PPE) as is necessary for the specific job. Most projects will require safety boots, hard hats and high visibility vests. Every project starts with an on site team safety meeting. The project manager reviews the project with team members and points out the safety concerns that may be presented on the job. Team members provide feedback on how to

achieve the best quality performance while always maintaining safety as the # 1 goal.

Team members are required to check all cameras and related equipment such as tripods and gimbals to make sure everything is up to product specifications. Modifications to equipment is not permitted unless authorized by management.

Company vehicles that will be used must have a safety check performed including checking tires for excessive wear or any visible damage to windows or vehicle safety equipment including back up and 360 cameras.

Drugs and Alcohol

Drug and alcohol use is strictly prohibited by ALL PRO USA. Random checks may be performed without notice. Failure to comply with a random drug or alcohol test will result in immediate termination. Drug testing will also be performed in the event of any accident or incident resulting in bodily harm or equipment damage. General use damage to equipment is not considered cause for testing.

Employees may proactively let the manager know if they are having a problem with drug and alcohol abuse. In this event the employee will be put on suspension without termination.

ALL PRO USA will provide assistance in getting the employee into a substance abuse program. Provided the employee completes the program successfully and with a report from the program supervisor the employee will be reinstated on a temporary basis for evaluation. The employee may not perform work in the field at this time. After 30 days with weekly testing the employee may return to full time in field work.

Projects across the USA

ALL PRO USA works for national and regional construction companies across the USA. Samples of work completed for companies including, Infrasource, Insituform, Ageion, Garney, Orders and R.W. Dunteman are on our website. We have also done successful projects for Departments of Transportation in Ohio, Michigan, Illinois, Virginia and Maryland. Samples of this work may be viewed on our dedicated web page www.PreConVideo.com ALL PRO USA has done sensitive work on military bases for the US Navy and US National Guard. (not on our website for security purposes)
